**Shipped Semen Breeding Contract**  
**Andalusian / PRE Mares**

This Stallion Breeding Contract for the breeding season of 2011, is made and entered into on this \_\_\_\_ day, of 2011, and is by and between Nancy LeNau of Centaur Farms, Inc., hereafter designated as "Breeder" and \_\_\_\_\_, hereafter designated as "Mare Owner." Mare Owner agrees to breed the mare know as \_\_\_\_\_, Registration No. \_\_\_\_\_ to the black Andalusian /PRE stallion know as **Cruz EDA, IALHA Registration No. 9646(S), Codigo No. 7240150501EU657**, for the breeding fee of \$2,500.00. In addition, Mare Owner will be responsible for all costs related to collection and shipping semen.

**This breeding shall be subject to the following terms and conditions:**

1. This \$2,500 breeding fee includes a non-refundable booking fee of \$500 due upon execution of this contract. The balance of \$2,000 plus a shipping fee of \$350 (*for the first shipment of semen*) is due 30 days prior to the collection and shipment of any semen. Should additional semen shipments be required, Mare Owner agrees to pay \$325 prior to each additional shipment. Each subsequent year breeding is necessary, a rebooking fee of \$100 will be required. (*This is a two year contract.*)
2. Breeder agrees to ship cooled semen from the above mentioned stallion to Mare Owner the fastest way possible using FedEx. Should Mare Owner desire another method, it must be arranged and additional charges may apply. The Veterinarian for the mare or Mare Owner will be required to contact Breeder at least one week before the mare is ready to breed and 36 hour notice before the actual shipping date. This will give Breeder ample time to plan the shipment. Semen will not be shipped unless prior notice is given. Centaur Farms, Inc. will not ship on Saturdays, Sundays and Holidays. Breeder will make every reasonable effort to collect and ship on the desired date, but cannot be held responsible in the event of unforeseen conditions such as airline strike, severe weather, etc.
3. Mare Owner agrees to breed only the mare booked and not use semen to breed other mares. Breeder requires that the semen be inseminated by a licensed Veterinarian and that this Veterinarian be required to sign a form provided by Breeder that the proper mare has been inseminated and that the remaining semen, if any, has been destroyed. The Veterinarian is required to examine the registration papers of the mare in order to determine if this is indeed the mare that has been booked. There will be no exception to this requirement.
4. It is agreed that the mares to whom semen is shipped shall be checked for pregnancy by a licensed Veterinarian between 18 and 30 days after the last date of breeding. Results of this examination, whether positive or negative, must be signed by the examining Veterinarian and forwarded to Breeder within 15 days of examination. Mare Owner is solely responsible for having this pregnancy check performed and for forwarding the required Veterinarian certificate to Breeder. Failure to do so shall render the live foal guarantee null and void.
